* = Couple's may opt-in for a more Traditional Styled Film/Edit. This film is a longer cut of your wedding in chronological order and includes all of the multi-camera sequences in their entirety. This is meant to be more of a full account and archive of your wedding, leaving out room for a more Film/Movie styled edit. This film can be anywhere from 45-90 minutes depending on your day's events. These films are chaptered and usually include: the first look, ceremony, toast and first dances in it's entirety, ruling out the possibilities for a more Film/Movie styled edit.

- FEATURE FILM -

is the main film that we edit for most weddings. This length is perfect because it is long enough to include the entire story of the day but short enough to captivate anyone. Couples love sharing this video on social media with their family and friends. Best if paired with the second cinematographer option.

-DOCUMENTARY STYLED FILM
